Electric Forklift

\$ 18.999

- Configurable lift height: Up to 16 ft (mast options available)
- IPX4 water resistance — suitable for rainy
- Flexible configuration to meet specific site requirements
- Side shift included

- Dimensions 95" L x 46" W x 84" H
- Load capacity (configurable) 4,000–7,700 lbs
- Load center 20 in
- Lift height (configurable) 10–16 ft
- Overall width 46 in
- Turning radius 84 in
- Battery (selectable capacities) Lithium 150/205/230/430 Ah
- Tire type Pneumatic
- Forklift weight Varies by configuration

Electric drive system lowers energy use and costs.

Reinforced chassis and mast handle heavy workloads.

Lithium battery delivers fast charging and long runtime.

Intelligent controls enhance safety.

Built for harsh indoor and semi-outdoor environments.

MAX is an electric forklift platform designed for harsh conditions and intensive use. Built for warehouses, logistics hubs, and facilities running 2–3 shifts, MAX combines reinforced construction, advanced protection, and flexible options to meet demanding requirements.

One of the key advantages of MAX is its configurability. Both lift height and load capacity can be customized at the time of order, allowing businesses to select the exact setup needed for their workflow. This makes MAX a versatile solution for operations that require adaptability rather than a fixed specification.
